

Dear Governor Schwarzenegger,

California's 40,000+ raw milk consumers ask that you please sign SB 201, The Fresh Raw Milk Act of 2008, into law. This bill pioneers food safety standards that provide greater consumer protections than current law, ensuring that we have the safest raw milk possible on our store shelves. The bill has bipartisan support in the legislature and the unanimous support of all three assembly committees that reviewed the bill.

Demand for raw milk is growing rapidly across the nation as part of the trend toward natural, whole foods diets. Thousands of families are discovering the remarkable health benefits that raw milk provides, and other states are looking to California to be a leader by implementing this groundbreaking food safety legislation. We respectfully ask that you please sign SB 201 into law.

Sincerely yours,
